Web UI Developer

[APPLY](#)

 Multiple Locations 

We are a digitally native company where innovation, design and engineering meet scale. We use the latest technologies in the digital and cognitive field to empower organizations in every aspect. We want you to join us to work for the biggest clients in tech, retail, travel, banking, ecommerce and media, revolutionizing and growing their core businesses while helping them (and you!) stay ahead of the curve. Be part of a company with the most cutting-edge practices and technologies plus a unique team. Globant is an EOE M/F/D/V. For many positions relocation is available if needed. Globant does not accept unsolicited 3rd party resumes.

What Are We Looking For?

Right now, we're looking for Web UI Developer to join our teams to perform any type of design work independently and to lead designers of lower seniority.

What Will Help You Succeed

Prototyping techniques and tools.

Wireframing and high resolution mockups.

Knowledge in agile methodologies.

Knowledge of frameworks like Angular, React, Vue.js, Backbone, Node.js.

Knowledge of the latest trends regarding the design of UI and branding.

Perfect command of graphic and artistic design to perform intuitive and innovative user's interfaces.

Techniques and methodologies of UX design (People, card sorting, scenarios, etc.).

Proficient with front-end development technologies (HTML/CSS, Flash, Flex, Silverlight, mobile, etc).

Más de 3 años de experiencia con SQL

Diseño y creación de bases de datos relacionales

Hibernate

SCRUM

Capacidad de ordenar y manejar múltiples prioridades.

Autónomo.

Trabajo por objetivos.

Deseable:

Spring (Boot, Core, MVC, Data Access, Security)

Introduction

As an Application Developer, you will lead IBM into the future by translating system requirements into the design and development of customized systems in an agile environment. The success of IBM is in your hands as you transform vital business needs into code and drive innovation. Your work will power IBM and its clients globally, collaborating and integrating code into enterprise systems. You will have access to the latest education, tools and technology, and a limitless career path with the worlds technology leader. Come to IBM and make a global impact!

Your Role and Responsibilities

Are you passionate about developing software? Do you like being the member of a strong Agile team? Do you take pride in delivering GREAT tools for IBM? Are you interested in joining a ground breaking development team to deliver new tools for Executive Succession Planning?

Were looking for the very best Full Stack developers to join our team in Guadalajara! Apply now and lets get started.

- Required Technical and Professional Expertise
- **Strong** development experience on Java (4+ yeo)
 - **Strong** experience in Angular 6+ for frontend
 - Experience on Spring, Express, Nodejs for backend
 - Experience on Git, Docker
 - NoSQL/SQL databases
 - CI Tools like Jenkins, Travis, etc.
 - Knowledge of design patterns, data structures and frontend performance
 - Strong architecture skills
 - Experience building responsive web applications that are scalable and resilient
 - Testing culture, unit testing and automated system testing

- Preferred Technical and Professional Expertise
- Ability to work in a team environment to develop and implement design.
 - Works collaboratively with stakeholders to understand constraints and expectations.
 - Excellent written and verbal communication skills
 - Intermediate to Advanced English skills
 - Ability to manage multiple tasks in a dynamic, fast paced environment
 - Experience with Agile/Scrum methodologies
 - Knowledge of Web Accessibility

Hot

people are looking at this job. Apply now.

Este rol necesita un desarrollador apasionado de la web y tecnología. Alguien cuyo mantra sea el código limpio y buenas prácticas. Sabemos que el *seniority* se alcanza con práctica continua por lo que solicitamos que al menos tengas 4 años comprobables trabajando en desarrollo web de preferencia en entornos start-up o corporativos.

Requerimos que seas proficiente en el paradigma Orientado a Objetos, Análisis y Diseño de Software, y proactivo en la solución de errores en alguno de los siguientes lenguajes: Python, PHP o Java.

Del lado Front-end necesitamos que te sientas cómodo con Javascript ES6 así como dominar algún framework como React o Vue. Saber HTML5 y las etiquetas semánticas así como realizar código mantenible en CSS3 te harán un candidato que sobresalga del resto.

Por último, no necesitamos que seas experto en bases de datos relacionales aunque sí tener conocimientos suficientes sobre creación de tablas y la correcta relación de las mismas.

Full-stack Engineer (Python/React)

Empresa: TrustYou Madrid

Ciudad: Madrid

Jornada laboral: Completa

Main requirements

- Degree in Computer Science or closely related
- At least 4 years of profound professional experience with Front-end or Back-end focus
- Building beautiful, testable, reusable UIs in React, or any other Front-end technology
- Experience with implementing and designing RESTful APIs
- Experience with unit testing/integration testing is a plus
- English is mandatory

Nice to have

- Spanish is a plus

Full Stack Software Engineer

Oferta Premium

Empresa: [Epic Labs](#)

Ciudad: Madrid

REQUIRED EXPERIENCE

What are we looking for? Fundamentally, passion for what you do.

- Working experience in a similar role
- A degree in Computer Science, Telecommunications Engineering, a similar degree or equivalent knowledge out of your personal experience that you can demonstrate
- Medium to high English level. Ability to write clear documents in English such as designs as well as problem resolution reports. Most meetings take place in English.
- Experience with one or more of these programming languages/environments: Java/J2EE/Spring, C/C++, JavaScript/TypeScript/NodeJS, Python, Go.
- At ease with HTML and CSS
- Experience with one or more of these front-end frameworks: AngularJS, React, Polymer, Vue.js ...

YOU SHOULD BE FAMILIAR WITH

- Software development lifecycle (requirements, design, implementation, testing and releases). Source code control systems like Git
- Test-driven development methodologies, frameworks like Mocha, Jasmine, Karma...
- Linux OS and bash command line
- Containerization and Docker
- Network protocols: TCP/IP, DNS, HTTP and REST APIs
- Distributed systems and databases such as MySQL, Postgres and others of "nosql" type like MongoDB o CouchDB

THE SOFT SKILLS, PROCESS AND METHODOLOGIES

- Ability to handle multiple issues at a time in a fast paced environment
- Good communication skills
- Agile methodologies like SCRUM

Desarrollador Full Stack Senior (Java Angular)

NIELSEN

Apple • FrydChickn

You are focusing on the wrong things. Titles don't mean jack shit here.

Welcome to Apple :)

💬 3

Apple • FrydChickn

Offer letters do not mention your IC level (at least mine did not).
Once you get in, you can “see” your IC level in the internal HR account.
I honestly don’t think you should ask the recruiter to mention ICx on the offer letter,
why risk starting off on a bad note.

🕒 May 21, 2019

👍 0

Apple • HelloFresh

Apple does not disclose the ICT level in the offer letter; moreover, we don't have titles like Senior or Staff (meaning, when you get promoted, your ICT level changes, but not your title). Congrats on the offer! I guess since you received a written letter, you have already verbally committed to Apple, so welcome to Apple!

First 3 days at amazon, manager has no idea what I am supposed to be doing

[Amazon](#) · Faye

🕒 Sep 25, 2019 💬 488 Comments

Just started at Amazon as an SDE 1 (new grad). NHO was toxic with the first speaker setting up a really weird atmosphere, and like wtf was that bingo game is this a college visit? First actual day manager showed me my desk and had me sit on a couple of meetings. Day 2 just sat around watching whatever videos I had to do in Embark. SDE bootcamp was full so had to push that to later. My whole team is not native english speakers, so I have to ask them to repeat things or just nod my head like I understand

Should I be worried? What the heck should I do tomorrow day 4 (ermm I mean day 1)? there is only so many videos on Broadcast that I can watch.

Junior:

Hace, necesita mentoría,
no entiende del negocio.

Senior:

Hace, necesita poca o nula
mentoría, da mentoría,
entiende del negocio,
le interesa.
